

**UHU**<sup>®</sup>**CREATIV' FOAM RUBBER & FLEXIBLE MATERIALS  
QUICK-DRYING CONTACT ADHESIVE****PRODUCT DESCRIPTION**

UHU Creativ' Foam Rubber & Flexible Materials is a quick-drying contact adhesive. The special strong formula is colourless, low odour, does not dry brittle and has a good immediate bond for the perfect adhesion of foam rubber and other flexible materials to create pictures, collages, flowers, mobiles, finger puppets etc. The elastic adhesive film is water and temperature resistant, as well as acid and alkali free.

**FIELD OF APPLICATION**

Glues foam rubber and other flexible materials such as leather, rubber and flexible foam combined with many other materials.

**PROPERTIES**

- Special strong formula
- Does not dry brittle
- Good immediate bond
- Colourless
- Low odour

**PREPARATION**

**Personal safety:** UHU Creativ' Foam Rubber & Flexible Materials contains volatile, easily inflammable solvents, appropriate precautions should therefore be taken during working and storage.

**Surface requirements:** The areas to be glued must be dry and free of any dust or grease.

**APPLICATION****Directions for use:**

The adhesive is normally applied to both surfaces. The period of adhesion depends on the quantity of adhesive applied and the absorption capacity of the material for bonding. Firm adhesion is obtained between 5 and 20 minutes after application. The correct moment for joining has been reached when the adhesive, gently touched with the fingertips, has become touch-dry (so-called finger test). Press the parts together briefly and firmly. After assembling correction is no longer possible. The greater the pressure, the better the bonding result. The duration of the pressure is not essential for the strength of the bonding.

**Stains/residue:** Dissolver or light petrol should be used for the removal of smeared adhesive and the cleaning of working tools (brushes etc.).

**TECHNICAL PROPERTIES**

**Water resistance:** Very good

**Chemicals resistance:** neutral (acid- and alkali-free)

**TECHNICAL SPECIFICATIONS**

**Appearance:** slightly yellowish, clear

**Chemical base:** Synthetic rubber

**Consistency:** Medium viscosity

**Viscosity:** approx. 60-100 mPa.s.

**Solid matter:** approx. 32 %

**Density:** approx. 0,79 g/cm<sup>3</sup>

**STORAGE CONDITIONS**

Product should be stored in a dry, cool and frost free place.

**PACK SIZES**

tube 33 ml
